

***PUBLIC ADMINISTRATIONS ECONOMIC ACCOUNT IN THE
A.C.OF THE BASQUE COUNTRY***

Methodology note

2011

PUBLIC ADMINISTRATIONS ECONOMIC ACCOUNT IN THE A.C.OF THE BASQUE COUNTRY

The current series of the Public Administrations Economic Account corresponds to the series of non-financial accounts, following the methodological criteria of the European System of National and Regional Accounts (ESA-95), contained in Regulation (EC) N° 2223/96 by the Council of 25 June 1996. In addition, criteria contained in the ESA-95 Manual on public deficit and public debt were applied together with Regulation (EC) 2516/2000 relating to taxes and social contributions and the Council Regulation No 448/98 and 1889/2002 relating to the "Allocation of Financial Intermediation Services Indirectly Measured (AFISM) to sectors/branches of user activity".

The series was carried out using Base year 2005 and the main features were as follows:

I. Definition of the sector:

The ESA defines the Public Administrations sector (S.13) as that which "includes all the institutional units that are other non-market producers, whose production is destined to individual or collective consumption, which is mainly financed through obligatory payments made by units belonging to other sectors and/or carry out transactions to redistribute national income and wealth". To determine non market producers, a criterion based on 50% of the production costs will be used, i.e. if sales cover less than 50% of production costs, the institutional unit is another non-market producer. The application of this criteria is carried out in accordance with the ESA-95 Manual on public deficit and public debt.

The application of these criteria lead to an argument of institutional units included in the Public Administrations sector, mainly public companies. As a consequence, based on 2005 Public Administrations Economic Accounts in the A.C. of the Basque Country the following public institutional units are included:

PUBLIC ADMINISTRATIONS ECONOMIC ACCOUNT IN THE A.C.OF THE BASQUE COUNTRY

II. STATE REGIONALIZED ADMINISTRATION:

1.STATE ADMINISTRATION.

- An estimate out of the activity of the State Administration in the territory of the A.C. of the Basque Country was carried, following the criteria of monetary flow, i.e. focusing on expenditure and income located in the territory (territorialized expenditure according to the General Intervention of the State Administration -IGAE and the amount of non-assumed charges).
- Mutualismo Administrativo (MUFACE, ISFAS, MUGEJU)

2.SOCIAL SECURITY:

- Management Institutions (INSS, ISM) and General Treasury of the Social Security
- SEPE
- FOGASA
- Mutuials

PUBLIC ADMINISTRATIONS ECONOMIC ACCOUNT IN THE A.C.OF THE BASQUE COUNTRY

The consolidation of the Accounts of the Basque Administrations and State Regionalized Administration results in the Accounts of the Public Administrations of the A.C. in the Basque Country.

II.Adjustment for uncertain collection:

In application of Regulation (EC) 2516/2000, an adjustment for uncertain tax collection and social contributions is included, attributing a negative capital resources transfer, which means a negative effect on Capacity/Need for finance.

III.Capital injections

In accordance with the ESA-95 criteria and the ESA-95 Manual on public deficit and public debt, , financial operations “that are aimed to cover losses accumulated over several financial years or exceptional losses due to causes alien to the company” were registered as non-financial operations (SEC-95 4.165b), negatively affecting the Capacity/need for finance.

IV.Allocation of Financial Intermediation Services Indirectly Measured (AFISM)

In accordance with Council Regulations 448/98 and 1889/2002, the AFISM were allocated to the sectors and branches of user activities, forming part of intermediate consumption. This automatically implies an increase in non-market production and therefore, an increase in final consumption expenditure. In addition, interest paid and received must be adjusted (paid interest decreased and received interest increased), which leads to an increase in available income, which compensates higher final consumption expenditure, not affecting Saving or the Capacity/need for finance.

Note: The economic accounts of the Public Administrations were produced in collaboration with the statistical body of the Department of Treasury and Public Administration, responsible for the statistics operation, Economic Accounts of the Basque Administration
