

OTHERS PUBLICATIONS**METHODOLOGICAL ASPECT OF THE PREPARATION OF THE INPUT-OUTPUT TABLES**

Ed. 1987.- (Specialised technical study; 1)

[Price 2](#)

This publication is the first in a series dedicated to the study and description of the methodology used in self-designed production, as is the case with the creation of the Input-output tables of the A.C. of the Basque Country for 1985.

STATISTICAL ATLAS OF THE PYRENEES = ATLAS STATISTIQUE DES PYRÉNÉES = ATLES ESTADÍSTIC DELS PIRINEUS = PIRINEOETAKO ATLAS ESTATISTIKOA / INSEE, Govern d'Andorra, DATAR, IDESCAT, IEN, EUROSTAT, IAEST, EUSTAT.

Quadrilingual ed. (Spa/Baq/Cat/Fre)

Ed. 2002

Free[Edition available on the Website](#)

For the first time, within the framework of cross-border co-operation, several statistics offices from both sides of the Pyrenees have published a statistical atlas of the region. Although incomplete, this first attempt enables a statistical focus on the Pyrenees: an area of 49,850 sq.km, 1,101,000 inhabitants, 617,000 households among which 167,000 are second homes; 45,000 jobs in agriculture, 108,000 in industry, 40,000 in construction, 205,000 in the tertiary sector, 92,000 non-agricultural establishments and over 5.8 million tourists, are some of the data that can be found in this document.

EUROREGION : IN FIGURES = EUROESKUALDEA : ZENBAKITAN = EURORÉGION : EN CHIFFRES / EUSTAT and INSEE, Aquitaine Region.

Ed. 1982

[Price 2](#)

The aim is to bring the most commonly-used official classifications with their corresponding codes within the reach of the user, to make statistical works easily comparable. It compiles codes for Countries, Provinces, Municipalities, zones (habitat), family relationships, studies, economic activities of companies and main occupation or profession.

A version of the concepts of these classifications in Basque is also planned, in order to encourage the use of our language in responding to bilingual questionnaires.

NOMENCLATURES AND CODES = IZENDEGIAK ETA KODEAK

Ed. 1995

[Price 5](#)[Updated information on the Website](#)

In order to further the process of homogenisation of classifications, nomenclatures and codes in the sphere of the A.C. of the Basque Country, EUSTAT has prepared this publication, which sets out to fulfil the following statistical normalisation objectives: To bring the most commonly-used official classifications with their corresponding codes within the reach of the user as well as providing a basic medium in order to achieve homogenisation in the use of these codes in the A.C. of the Basque Country, allowing self-produced statistics to be comparable with those produced by other Bodies or Organisations, especially those of the European Union.

EXCEL MAPS OF THE A.C. OF THE BASQUE COUNTRY AND ITS SURROUNDINGS = EUSKAL AEKO ETA BERE INGURUKO EXCEL-ko MAPAK

Ed. 1999. (Electronic ed.: 1 CD-ROM)

[Price 6](#)

On many occasions we wish to represent information on planimetry and we are faced with an extremely laborious task; with the Office 97 version there is a tool that makes it easy to make this kind of graphs. The only problem is the availability of certain templates of maps that respond to geographic areas that we need to colour. The templates included on this CD are aimed at facilitating a series of environments that are capable of representing statistical information; they are as simple to use as the rest of the tools which enable graphs to be presented in Excel.

POLITICAL PORTRAIT OF NICOLÁS DE ARRIQUIBAR. From the use of the political arithmetic of Carles Davenant

Ed. 1987

**Out of print**

Re-edition of the work written by Jesús Astigarraga and José Manuel Barrenechea in remembrance of the renowned 18th century economist Nicolás de Arriquirar, on the occasion of the launch of the Basque Statistics Office / Euskal Estatistika-Erakundea / Instituto Vasco de Estadística on the 29th November 1986, following the passing of Law 4/86 and the application of its article 10.37.

ANALYSIS METHODS OF STRUCTURAL DEPENDENCE AND INTERDEPENDENCE BASED ON REGIONAL INPUT-OUTPUT TABLES: the productive structure of the A.C. of the Basque Country / Fernando del Castillo Cuervo-Arango

 Ed. 1986

 **Out of print**

This work sets out to analyse the techniques used for research into the productive structure based on regional input-output tables. The study of the productive structure and sectorial dependence and interdependence is probably the most common and extended application within input-output analysis at regional level.

MANUAL FOR THE MUNICIPAL REGISTER AGENT : A.C. of the Basque Country : Register 1986 = ERROLDA-AGENTEAREN ESKULIBURUA : Euskadiko K.A. : 1986ko Errolda / Basque Government, Statistics Direction, Provincial and Town Councils
