

INDUSTRIAL PRODUCTION INDEX OF THE BASQUE COUNTRY (IPI) MARCH 2013

## Industrial activity in the Basque Country fell by 0.9% in March 2013

**Compared to the previous month, February 2013, the industrial production of the Basque Country grew by 2.5%**

Industrial production of the Basque Country in March 2013 was down by 0.9% compared to the same month of 2012, in homogenous terms of the working calendar, according to Eustat data.

Compared to the previous month, February 2013, the industrial production of the Basque Country rose by 2.5%, once seasonal effects had been corrected.

By sector, and using the classification of the major industrial sectors, the evolution of the index for March 2013 compared to March 2012 revealed noticeable differences. Intermediate Goods fell by 2.4%, Equipment Goods were down by 1.2% and Consumer Goods as a whole fell by 0.6%, due to the drop experienced by Consumer Non-Durables, which decreased by 5.5%, compensated in part by the growth in Consumer Durables, which were up by 12.1%. Energy rose by 4.5%.

Month-on-month variation in March 2013 on February 2013 was positive for practically all large industrial groups. Equipment Goods rose by 4.1%, Intermediate Goods registered an increase of 3.1% and Energy recorded growth of 1.2%; Consumer Goods as a whole also increased in relation to February, by 0.8%, as a result of the positive evolution in Consumer Durables, which were up by 10.5%, although this was counteracted by the downturn in Consumer Non-Durables, measured at 3.3%.

Two of the largest sectors in Basque industry experienced growth in March 2013 with regards to the same month of the previous year: Wood, Paper & Graphic Arts, with an increase of 6.8% and Machinery & Equipment, which registered a rate of 5.5%.

**Methodological note:** The Industrial Price Index for March 2013 has been established in the new 2010 base and therefore succeeds the previous 2005 base. This base

change has involved the adaptation of the weighting coefficients to the structure of industrial activity from the year 2010 and the renovation of the panel of informant units with the object of increasing the representation of the indices, given the continuous evolution of the objective population of the study. The new base 2010 series have been linked to the previous base 2005 series and are available from the Eustat databank.
