The exceptional measures of confinement and partial or total closure adopted to confront the **COVID-19** global pandemic in the second two weeks of March 2020, have caused a highly disparate result in food sales (essential and critical activity) and in sales of other articles (extremely restricted activity). Thus, while sales of food products at large stores and food chains reflected a year-on-year rise of 18.5%, sales corresponding to other items experienced a downturn of 35.2%, with respect to the same month of the previous year, once corrected for calendar effects.

By province, there was an increase in all three: 2.5% in Álava, 0.3% in Bizkaia and 3.6% in Gipuzkoa compared to the same month of the previous year, all at constant prices and corrected for calendar effects.

Compared to the previous month, February 2020, food sales at constant prices and in deseasonalised terms, increased by 14.8% and sales of other products were down 34.8%.

In the accumulated total for January to March 2020, the Sales index in large stores and food chains registered 1.4% growth, due to the 7.7% increase in food sales, given that sales of other products fell by 11.0%. However, there was a positive trend in the three provinces: Álava increased in the year-to-date by 1.1%, Bizkaia by 0.3%, and Gipuzkoa by 3.3%, all at constant prices and in homogeneous terms of the working calendar.

The number of individuals employed in large stores and food chains in the Basque Country fell by 0.5% compared to the same month of the previous year and was down 2.3% on the previous month, in deseasonalised terms. In the accumulated total for these three months of 2020 the number of people employed was up 1.0% on the same period of 2019.
