

SURVEY ON TOURIST ESTABLISHMENTS. HOTELS AND RURAL ACCOMMODATION. JULY 2020

In the month of July 2020, half the number of overnight stays were recorded in the Basque Country compared to July of the previous year

The number of establishments that have maintained some activity has increased to 510, 138 more than in June, but less than the 581 in July 2019

The number of visitors at hotel establishments in the Basque Country in July 2020 stood at 179,843, equating to 340,376 overnight stays, compared to 328,082 visitors and 692,414 overnight stays during the same month of the previous year, i.e. 45.2% and 50.8% fewer in July 2020 than in July 2019, respectively, according to Eustat data. These data reveal the prolonged effect of the COVID-19 crisis on the hotel sector in the Basque Country.

Despite this, following the end of the state of alarm on 21 June and with the limitations and prior conditions established via the order of 9 May (SDN/399/2020) for the reopening to the public of hotels and tourist establishments, the activity of the sector progressively increased during the month of July.

In this context, in the Basque Country as a whole, establishments that have maintained some hotel activity went from 372 recorded in June to 510 in the month of July 2020 – still below the 581 recorded in July 2019. Establishments that closed for the entire month, on the other hand, decreased from 246 in June to 109 in July 2020, triple the number of those that were closed in the same month of the previous year, namely 33.

NOTE REGARDING THE EFFECT OF THE COVID-19 CRISIS ON THE SURVEY ON TOURIST ESTABLISHMENTS
