Analysing the evolution of prices by province, there was a year-on-year drop in all three, being the sharpest in Álava (- 8,8%), followed by Gipuzkoa (- 4,2%) and Bizkaia (- 4,0%), all in relation to March 2021, at constant prices and in homogeneous terms of the working calendar. In contrast, in respect of February 2022, Gipuzkoa underwent a positive month-on-month variation of 1.9%, whereas sales in Bizkaia and Álava were down by 0.4% and 0.6%, respectively, in deseasonalised terms.

In the cumulative total for the first quarter of 2022, the Sales index in large stores and food chains was down 1.1%, due to the 5.3% drop in sales of food products, and despite the cumulative increase of 8.5% in sales of other products.

By province, the cumulative variation for the year to date was positive in the case of Bizkaia, with sales 0.6% higher than in the same cumulative period of the previous year. However, in Álava and Gipuzkoa sales in the first quarter of the year were down 5.8% and 2.0%, respectively.

The number of people employed in large stores and food chains in the Basque Country rose by 2.7% in March 2022 in relation to the same month of the previous year. As regards the previous month, February 2022, employment fell by 0.5%.

### NOTE

Year-on-year variations are calculated using the series corrected for calendar effects and the month-on-month variations are calculated using the deseasonalised series.

Included as persons employed considered in this and other short-term indices, are those covered by an ERTE (Temporary Labour Force Adjustment Plan), following the definition of persons employed indicated by the Statistical Office of the European Union (Eurostat) in its manual [Methodology of Short Term Business Statistics](#).

Eustat would like to thank all the establishments that have collaborated in preparing the Large Stores and Food Chains Trade Index. As a result, the index for March 2022 was calculated with **100.0% coverage**.
