Source: Eustat. Industrial production index

In the evolution of the index in June 2022 compared to June 2021, the major industrial sectors presented positive performance. The *Energy* sector, which includes production and supply of electrical power and oil refining, saw a growth in production of 24.5%. *Capital Goods* (which include the manufacture of motor vehicles, construction of locomotives and railway material, naval construction and manufacture of aircraft), increased by 17.5%, whereas *Intermediate Goods* were up 4.2%. This latter sector includes the activities of metallurgy and manufacture of metal products, chemical industry and manufacture of rubber and plastic products.

Consumer Goods, as a whole, posted a year-on-year increase of 1.8%, driven by the 4.3% rise in *Consumer Non-Durables*, given that *Consumer Durables* were down 7.6%. Included within *Consumer Non-Durables* are the activities of processing and conservation of foodstuffs; manufacture of cleaning and hygiene products; and manufacture of clothing. The manufacture of furniture and domestic appliances are, among others, the activities included in the *Consumer Durables* sector.
