By economic destination of goods, production in *Consumer Goods* posted a negative year-on-year performance in November 2025, with a 1.5% decrease in production for the sector as a whole. This decrease was fundamentally due to the performance of *Consumer Non-Durables*, whose production fell by 3.4%, compensated, in part, with *Consumer Durables*, whose production increased, in respect of November 2024, by 6.7%. Among other activities, *Consumer Durables* includes the manufacture of furniture and domestic appliances. *Consumer Non-durables* includes the activities of processing and conserving foodstuffs; the manufacture of cleaning and hygiene products; pharmaceutical products; and the manufacture of clothing.

Production of *Capital Goods*, which include the manufacturing of motor vehicles; construction of locomotives and railway material; and naval construction and the manufacture of aircraft, increased by 3.7% compared to the previous November.

In *Intermediate Goods*, which includes metallurgy and manufacturing of metal products, the chemical industry and manufacturing of rubber and plastic products, production fell by 1.1% in year-on-year terms.

Finally, *Energy* production increased by 2.2% in November 2025 in relation to the same month of the previous year. This sector includes the production and supply of electricity and oil refining.
