

SURVEY ON TOURIST ESTABLISHMENTS (EETR) HOLY WEEK 2006

## The number of visitors increased by 21% and overnight stays rose by 22% during Holy Week and Easter 2006

### *The level of occupancy increased by almost four percentage points*

Over the period between Holy Week and Easter Saturday there were 69,983 entries by visitors at **hotel establishments** in the A.C. of the Basque Country, according to Eustat data. This figure represents 21% more visitor entries, that is to say, 12,000 more people than a year before.

The number of overnight stays came to 139,473 and was 22% greater, i.e. over 25,000 stays than during the same period in 2005.

The average stay per visitor at hotel establishments improved slightly on the previous figure, rising from 1.98 days per visitor a year before to 1.99 days this last Holy Week.

The level of occupancy by places was 4% higher than the level reached a year before. This index was 48.05% in 2005 and came to 51.83% in the same period in 2006.

Over the central days during Holy Week (Thursday, Friday and Saturday) the level of occupancy by places came to 80%.

**Agrotourism** registered 5,083 visitor entries, 14% more than the same period in 2005. The number of overnight stays was 15,287, 12% more than a year before. The origin of this lower evolution of overnight stays on entries lies in the reduction in the average stay per visitor, which fell slightly from 3.8 days a year before to 3.01 days this Holy Week. The level of occupancy by places fell slightly by 0.4% at **Agrotourism** establishments, due mainly to a greater offer of places.
