

INDUSTRIAL STATISTICS OF THE BASQUE COUNTRY 2011

## The turnover figure for Basque industry grew by 9.8% in 2011

### **Personnel employed decreased by 2.5%**

The net turnover figure for the industrial sector of the Basque country registered nominal growth of 9.8% in 2011, according to data provided by Eustat. With this growth, in 2011 the industrial sector confirmed the recuperation initiated a year before, although sales figures remained lower than the period before the crisis.

The number of employed individuals stood at 213,405, which was a decline of 2.5% compared to the previous year and a loss of 5,400 jobs.

For its part, Added Value at factor cost grew by 1.5% and the Gross Operating Surplus was up by 3% which, together with the fall in depreciations, caused the Net Surplus to rise by 8.4%. Personnel costs practically remained the same, up 0.6%. The result of the financial year stood at 2,007 million euros, with a drop of 8.2% with regards to 2010.

### **Main industry variable. Basque Country. Current prices (thousands €)**

	2010	2011	Δ %
Employees NU	218.819	213.405	-2,5
Gross Value Added factor cost	14.563.855	14.789.069	1,5
