

## Exports of goods from the Basque Country during September fell by 0.2% due to the drop in exports of energy products

**Up to September 2018 exports grew by 7.9% and imports by 8.1%**

**Exports of goods** from the Basque Country registered a slight annual downturn of 0.2% in September 2018, according to EUSTAT data. As a whole, the total exported was 2,106.8 million euros compared to 2,111.8 million in the same month of the previous year.

Bizkaia is the province that accounted for the decrease (-11.7%), due to the drop in both exports of *Non-Energy Products* (-10.1%), which this month represented 77% of this province's total exports, and *Energy Products* (-16.7%). The other two provinces compensated, in part, for this decrease with growth of 1.0% in Álava and 14.9% in Gipuzkoa.
