All environmental taxes are grouped into three categories: Energy taxes, Transport taxes, Pollution taxes and Resource taxes.

Following these groupings, **Energy taxes** were the largest, and rose to 1,083 million euros in 2018, representing 86.2% of the total. Within this group, the most significant was the special hydrocarbon tax which, with 922 million, accounted for 85.2% and was up 3.4% in respect of 2017. Energy taxes as a whole increased by 4.7% compared to 2017.

In second place, in order of importance, were **Transport taxes** which represented 13.0% of the total, reaching 163 million euros in 2018, up 3.6% on the previous year. The main tax in this category is the tax on mechanical traction vehicles, which with 136 million euros in 2018 accounted for 83.7% of this group of taxes.

Finally, **taxes on pollution and resources** represented the remaining 0.8% and had a greater year-on-year variability; in 2018 they fell by 0.9% compared to the previous year, remaining at 10 million euros.

In terms of GDP, environmental taxes accounted for 1.63% in 2018, below the 1.84% estimated for Spain, and the 2.40% of the European Union 28 (EU-28).

With regards to total taxes in the Basque Country, in 2018 environmental taxes accounted for 7.6% of all taxes included in the national accounting system. As regards classification by type of tax, most taxes of an environmental nature were concentrated in *Taxes on products, excluding VAT and taxes on imports* (52.4%), reaching 1,079 million euros.
