The index showed a downward trend for all the major industrial sectors in June 2020 compared to June 2019. *Intermediate Goods* fell by 23.0% and *Capital Goods* were down 13.5%. Included among the former are the activities of metallurgy, manufacture of metal products, chemical industry and manufacture of rubber and plastic products; while among the latter it is worth mentioning manufacture of motor vehicles, construction of locomotives and railway material, naval construction and manufacture of aircraft.

*Consumer Goods*, as a whole, posted a year-on-year decrease of 10.6%, due to the 17.2% decrease in *Consumer Durables* and the 9.1% drop in *Consumer Non-Durables*. Within *Consumer Durables* are the activities of manufacture of furniture, domestic appliances and electronic products. Included in the large sector of *Consumer Non-Durables* are the preparation, processing and conservation of foodstuffs; manufacture of cleaning and hygiene products; and manufacture of clothing.

*Energy* fell by 17.1%, once corrected for the appropriate calendar effects. Among the activities that stood out in this sector were the supply of electrical power and oil refining.

In contrast, the month-on-month variation, June 2020 on May 2020, showed a positive evolution in all the main industrial sectors, except in the case of *Energy*, which fell by 0.9%, once corrected for seasonal effects. *Intermediate Goods* increased by 19%, *Capital Goods* were up 9.3%, and *Consumer Goods*, as a whole, rose by 1.9%, due to the combination of two increases of differing amounts: *Consumer Durables* increased by 6.6% while *Consumer Non-Durables* were up 1.0%.

## NOTE ON THE EFFECT OF THE COVID-19 CRISIS ON THE JUNE INDUSTRIAL PRODUCTION INDEX

The state of alarm declared in Royal Decree 463/2020 of 14 March in order to manage the health crisis caused by COVID-19 ended on 21 June. The exceptional measures adopted during the state of alarm have had a direct impact on the activity of the establishments that participate in the Industrial Production Index.

Eustat would like to thank all the establishments that have collaborated in making this effort despite the extraordinary circumstances. As a result, the June index was calculated with **94.1% coverage** of the sample - whose information was collected during July.

The models used in the correction of calendar effects and deseasonalisation of the series include the effect of COVID-19 on the variables studied, following the recommendations of the Statistical Office of the European Union (Eurostat) (Eurostat) in its methodological note Guidance on Time Series Treatment in the context of the COVID-19 crisis.
