A(m) / A(m-12) Year-on-year variation rate for the accumulated period from January to the current month of current year compared to the same accumulated period last year

**Source: Eustat. Large Stores and Food Chains Trade Index-IGSC**

By province, in September 2020 all three registered a year-on-year increase in sales at constant prices, with a rise, once corrected for calendar effects, of 4.1% in Álava; 4.6% in Bizkaia; and 7.6% in Gipuzkoa.

**In the accumulated total for January to September 2020**, the Sales index in large stores and food chains was up 1.7%, due to the 8.8% increase in sales of food products, and the decrease of 12.2% in sales of other products.

Sales increased in all provinces in the year-to-date: Bizkaia by 0.5%, Álava by 2.6%, and Gipuzkoa by 3.2%, all at constant prices and in homogeneous terms of the working calendar.

The number of people employed in large stores and food chains in the Basque Country in September 2020 fell by 0.3% compared to the same month of the previous year and was down 0.6% on the previous month, in deseasonalised terms.

In the accumulated total for the first nine months of 2020 the number of people employed was up 1.3% on the same period of 2019.

**NOTE:**

Included as persons employed considered in this and other short-term indices, are those covered by an ERTE (Temporary Labour Force Adjustment Plan), following the definition of persons employed indicated by the Statistical Office of the European Union (Eurostat) in its manual [Methodology of Short Term Business Statistics](#).

The models used in the correction of calendar effects and deseasonalisation of the series include the effect of COVID-19 on the variables studied, following the recommendations of the Statistical Office of the European Union (Eurostat) (Eurostat) in its methodological note [Guidance on Time Series Treatment in the context of the COVID-19 crisis](#).

Eustat would like to thank all the establishments that have collaborated in making this effort despite the extraordinary current circumstances. As a result, the September index was calculated with **88.10% coverage** of the sample - whose information was collected during October.
