

Deaths increased by 6.6% in the second quarter of 2022 in the Basque Country and those caused by COVID-19 were up 14.5%

In the cumulative total of the first quarter of 2022, deaths rose by 7%

In the second quarter of 2022 the number of deaths in the Basque Country stood at 5,775, up 6.6% on the same period of the previous year, according to Eustat data. In the cumulative total for the year, between January and June, the number of deaths was 12,211, 7.0% higher than in the same period of 2021.

Deaths rose in all three territories, with the increase being particularly significant in Álava and Bizkaia: in Álava they increased by 9.5% to a total of 792 people and in Bizkaia by 9.3%, with 3,150 deaths. The increase in Gipuzkoa was more moderate, at 1.2% and 1,833 deaths. By sex, 2,925 women and 2,850 men died, which was an increase of 9% for women and 4.2% for men.

Deaths of residents in the Basque Country per month

Source: Eustat. Death Statistics

Amongst the deaths that occurred in this second quarter, 10 corresponded to children under 1 year of age (0.2%) and 101 to centenarians (1.7%).

The main causes of death were tumours and circulatory system diseases, which caused the deaths of 1,547 and 1,370 individuals, respectively, which means that together they accounted for 50.5% of deaths. COVID-19 was the third cause of mortality with 364 deaths (6.3%), 14.5% more than in the same quarter of the previous year.

The cause of death continued to vary according to sex. Among men, tumours caused more deaths than diseases of the circulatory system, whilst among women the main cause of death was diseases of the circulatory system, followed by tumours in second place.

Population growth in the Basque Country in the second quarter of 2022 was negative, with a population decrease of 2,456. The population decreased in the three provinces: by 1,519 people in Bizkaia, 750 in Gipuzkoa and 187 in Álava.

There were 364 deaths as a result of COVID-19 in the second quarter of 2022

COVID-19 caused a total of 364 deaths, 46 more than in the same quarter of 2021, but still far from the 1,241 which occurred in the same months of 2020. These deaths can be classified into 2 groups: 363 confirmed COVID-19 deaths and 1 probable COVID-19 death; there were a further 145 deaths in which COVID-19 was among the certified causes of death, but without being the main cause.
