By economic destination of goods, in *Intermediate Goods* which includes metallurgy and manufacture of metal products, the chemical industry and manufacture of rubber and plastic products, there was a year-on-year increase in production, with growth of 1.5%.

Production of *Capital Goods*, which include the manufacture of motor vehicles, construction of locomotives and railway material, naval construction and manufacture of aircraft, also increased in relation to September of the previous year, by 8.2%.

However, *Energy* production fell by 5.1% in year-on-year terms in September 2023. This sector includes the production and supply of electricity and oil refining.

*Consumer Goods* also posted a negative year-on-year performance in September 2023, with a decrease in production of 4.0% for the sector as a whole. This decrease was primarily due to the performance of *Consumer Durables* which includes the manufacture of furniture and domestic appliances, which posted a reduction of 15.4%. Production of *Consumer Non-durables* decreased by 1.1%. These include the activities of processing and conserving foodstuffs; the manufacture of cleaning and hygiene products; pharmaceutical products; and the manufacture of clothing.
