

## Industrial activity in the Basque Country fell by 0.1% in November 2023

***In the balance of the first eleven months of 2023, production decreased by 0.3%***

The industrial production of the Basque Country in November 2023 was down 0.1% compared to the same month of the previous year, in homogeneous terms of the working calendar, according to Eustat data. In this manner, cumulative production in the first eleven months of 2023 was 0.3% below that observed during the same cumulative period of the previous year.

However, in relation to the previous month, industrial activity in the Basque Country increased by 0.3% this last month, once corrected for seasonal effects.

### Year-on-year variation rate of the industrial production index in the Basque Country (%)

By economic destination of goods, there was a year-on-year decrease in production of 0.8% in *Intermediate Goods* which includes metallurgy and manufacture of metal products, the chemical industry and manufacture of rubber and plastic products.

*Consumer Goods* also posted a negative year-on-year performance in November 2023, with a 2.5% drop in production for the sector as a whole. This decrease was due to the performance of *Consumer Durables*, including the manufacture of furniture and domestic appliances which posted a reduction of 6.5%. In turn, production of *Consumer Non-durables* decreased by 1.6%. These include the activities of processing and conserving foodstuffs; the manufacture of cleaning and hygiene products; pharmaceutical products; and the manufacture of clothing.

*Energy* production also decreased in November 2023, by 7.2% compared to the same month of the previous year. This sector includes the production and supply of electricity and oil refining.

However, production of *Capital Goods*, which include the manufacture of motor vehicles, construction of locomotives and railway material, naval construction and manufacture of aircraft, increased by 4.0% in relation to the previous November.
