By economic destination of goods, in February 2024 *Energy* production increased by 8.6% compared to the same month of the previous year. This sector includes the production and supply of electricity and oil refining.

Production of *Capital Goods*, which include the manufacture of motor vehicles, construction of locomotives and railway material, naval construction and manufacture of aircraft, increased by 2.9% in relation to February of the previous year.

*Consumer Goods* also posted a positive year-on-year performance in February 2024, with a 1.4% rise in production for the sector as a whole. This increase is due to the performance of *Consumer Non-Durables*, which includes the activities of processing and conserving foodstuffs; the manufacture of cleaning and hygiene products; pharmaceutical products; and the manufacture of clothing, which posted an increase of 4.8%. However, production of *Consumer Durables* was down 12.4%. The latter includes the manufacture of furniture and domestic appliances.

In *Intermediate Goods*, which includes metallurgy and manufacture of metal products, the chemical industry and manufacture of rubber and plastic products, there was a year-on-year decrease in production of 0.3%.
