

## Current healthcare expenditure in the Basque Country was up 6.0% in 2023, reaching 8,554 million

**Current spending on healthcare stood at 9.2% of GDP and expenditure per inhabitant stood at 3,882 euros**

Current healthcare expenditure in the Basque Country stood at 8,554 million euros in 2023 (9.2% of GDP), according to data prepared by Eustat in accordance with the OECD methodology published in the System of Health Accounts (SHA 2011). The corresponding amount per capita was 3,882 euros, up 5.4% on the previous year.

Healthcare expenditure measures the final consumption of goods and services for health, that is, current expenditure by any financing agent. The financing of this expenditure includes, as a whole, the Public administrations, Compulsory health insurance, Voluntary health insurance and Direct payment by households.

Since 2020, total current expenditure in absolute terms has grown at an average annual cumulative rate of 5.0%, and in the past year, it has risen by 6.0%, going from 8,068 million in 2022 to 8,554 million in 2023.

Current spending on healthcare as a percentage of GDP has dropped by 0.1 percentage points over the last year. Meanwhile, expenditure per inhabitant has increased by 5.4%, rising from 3,683 euros in 2022 to 3,882 euros in 2023.

With regard to the sources of **funding**, of the 8,554 million euros of current expenditure in 2023, 5,944 million euros corresponded to the Public administrations together with Compulsory health insurance, representing an increase of 5.5% compared to 2022. The remaining 2,610 million euros corresponded to Voluntary health insurance together with Direct payment by households, a rise of 7.1% in respect of the previous year.

A detailed analysis of the data from the Basque Country Health Account corresponding to **expenditure by function** shows that the largest category continued to be Curative healthcare (56.9%), with an increase in expenditure of 6.5% in 2023, reaching 4,867 million euros. The second largest function was Medical Products (pharmaceutical products, medical and therapeutic equipment), which represented 16.8% of current expenditure and recorded an annual increase of 7.2%. In third place, expenditure on Long-stay healthcare provision (which includes expenditure on the healthcare of dependants) accounted for 14.7% of current expenditure and saw more moderate growth of 3.5% compared to the year before. Next came expenditure on Auxiliary healthcare services (including spending on clinical analysis, diagnostic imaging and medical transport), which reached 429 million euros in 2023 and represented 5.0% of current expenditure.

The remaining functions, despite accounting for a lower relative share of spending, registered significant growth in 2023: Rehabilitative healthcare was up 12.1%, reaching 180 million euros; expenditure on Prevention services increased by 7.8% and totalled 109 million euros; and the function Governance and administration of the healthcare system saw spending rise by 5.9% to 270 million euros.
