**TIME BUDGET SURVEY 93. Social time use = DENBORA-AURREKONTUEN INKESTA 93 : Denboraren erabilera soziala**

Ed. 1994

[Price 3](#)

Survey carried out at A.C. of the Basque Country level, whose aim is to offer an exhaustive analysis of the way that time is distributed in the reference population, in terms of hours and minutes. In short, it sets out to provide an accurate overview of everyday life for the inhabitants of the Basque Country.

Using this survey as a basis, and in collaboration with several different authors, the following works have been published:

**TIME BUDGET SURVEY 1993. Social determiners in everyday life** / Victorino García de la Red.- (EPT93; 1)

 Ed. 1996

[Price 2](#)

The aim of this analysis is to identify the differing types of daily patterns as regards the distribution and organisation of time during the day and later to find out why large groups of people, despite living in different geographic areas, have similar sequences of daily activities.

**TIME BUDGET SURVEY 1993. Time use in social participation activities** / Jesús Arpal and Iñaki Domínguez.- (EPT93; 2)

 Ed. 1996

[Price 2](#)

Research centred on the analysis of time use in social participation activities with two basic activities: to analyse the influence of socio-demographic variables in the practice of social, political, religious or cultural participation activities and to analyse the patterns and characteristics that this participation takes.

**TIME BUDGET SURVEY 1993. Analysis of the differences between sexes in the use of time** / Roger Soler Villalta and Miren Huidobro Lorenzo

.- (EPT93; 3)

 Ed. 1996

[Price 2](#)

This research makes a detailed analysis of people's life patterns depending on whether they are men or women. The aim is to assess how comparable the sexes are in terms of different types of activities, paying special attention to the organisation and distribution of domestic chores within the family.

**TIME BUDGET SURVEY 1993. Employment as a differentiating factor in the use of time in the A.C. of the Basque Country** / Amaia Alonso Bikuña, Fátima Gómez Sota and Esther Raya Díez.- (EPT93; 4)

 Ed. 1996

[Price 2](#)

Descriptive analysis of time use made by the employed, unemployed and inactive Basque population during everyday life. In short, it sets out to explain the role played by the "employment" variable as a differentiating factor in the use of time by a specific group.

**TIME BUDGET SURVEY 1993. Analysis of types of working days / Josune Iraola, Yolanda Pérez and Anjeles Iztueta**

.- (EPT93; 5)

Ed. 1997

[Price 2](#)

Using techniques offered by factor analysis we can find out what different types of working days exist and classify individuals accordingly. Subsequently, we can quantify the volume and make-up of the resulting groups.
